

# FIMET F1 DENTAL UNITS

# F1 CONTINENTAL

## With the F1 CONTINENTAL

instrument head everything needed is easy to reach. This minimises eye fatigue as you can focus on work in the mouth without the need to look away from what you are doing. The instrument arm has precise and well-balanced movements. The whip hose instrument delivery system of F1 CONTINENTAL features the longest tubings on the market with absolutely no pullback effect.

**All Fimet units** can be delivered in pneumatic or electric version. The Fimet chair is always electric driven.

■ Zero pullback whip arms.

# F1 TRADITIONAL

**F1 TRADITIONAL** incorporates Fimet's characteristic great ergonomics on the dentist's module, where instrument pick-up and repositioning are made easy all the times. The instrument head can be guided precisely and effortlessly.

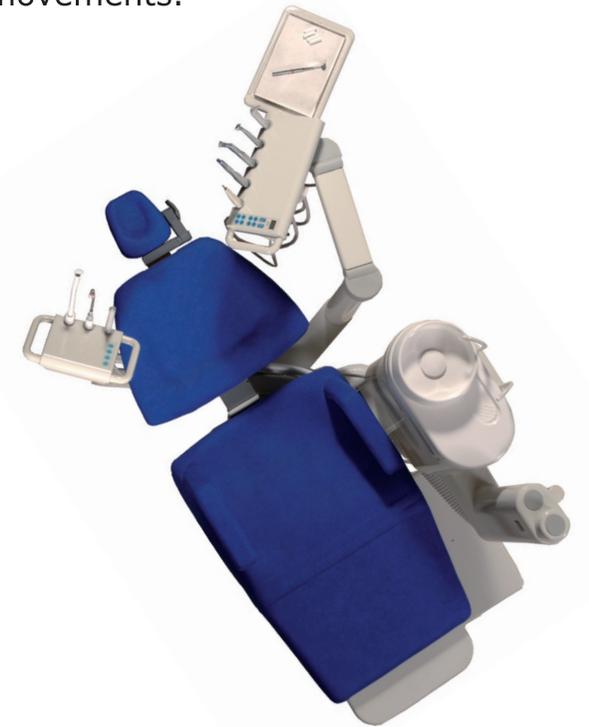

**CUSTOMISATION in all F1 UNITS** • Instrumentation: KaVo®, Bien Air®, NSK®...  
• Operation light: bulb/LED • Suction system: wet line/dry line/Metasys®/Dürr®/Cattani®...

■ A large selection of control systems - available for all F1 models.

# F1 SIDE

**F1 SIDE can be used** equally well by both right- and left-handed dentists. It is a compact dental unit providing better positioning capabilities to a wider range of dental practitioners. The heavy-duty instrument and suction arms of F1 SIDE have light and smooth movements.

■ An easy left-handed operation possible.

# F1 CITY

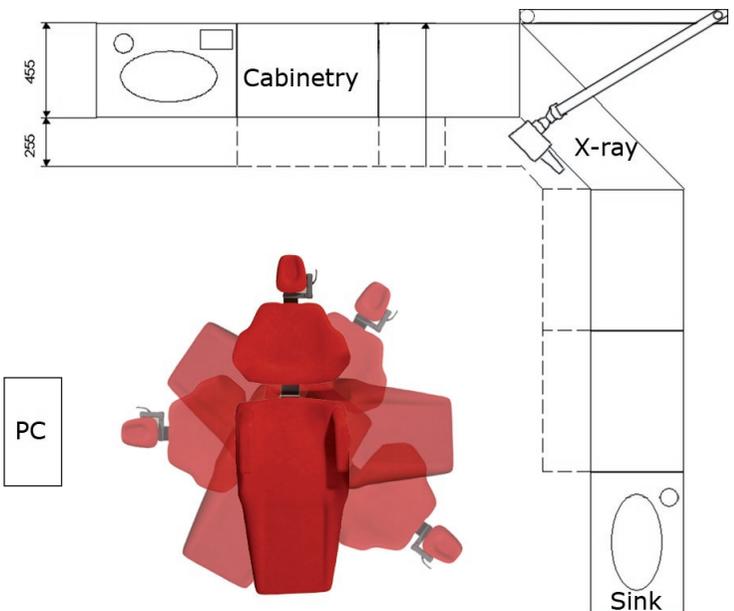

F1 Soft    F1 Classic    F1 Combi

**F1 CITY is an equipment** with a suction module placed in the cabinetry and the unit without a cuspidor and suction for improved hygiene.

The 224° rotation of F1 patient chairs is an excellent feature to take advantage of the cabinetry installed small devices, suction, PC etc.

■ F1 patient chairs rotate 224°.

## F1 CEILING

**F1 CEILING** creates an airy and fresh look to the clinic. The instrument bridge can be easily moved either to the left or right side of the patient chair allowing both right- and left-handed dentists to use the same chair. F1 CEILING saves valuable floor space being ideal for small clinics. It even improves hygienics by making cleaning easier.

## F1 CART

**The stable and mobile** F1 CART rolls smoothly on different surfaces. It is designed for providing the best possible set-up for specialised treatments such as implantology and surgical dentistry.

## F1 WALL MOUNT

**F1 WALL MOUNT allows** flexible positioning and easy patient access. The instrument bridge folds out of the way neatly when not in use being less intimidating for patients.

F1 PRIME

F1 EUROPA

F1 MONDO

■ NB separate brochures are available of the following F1 UNITS.

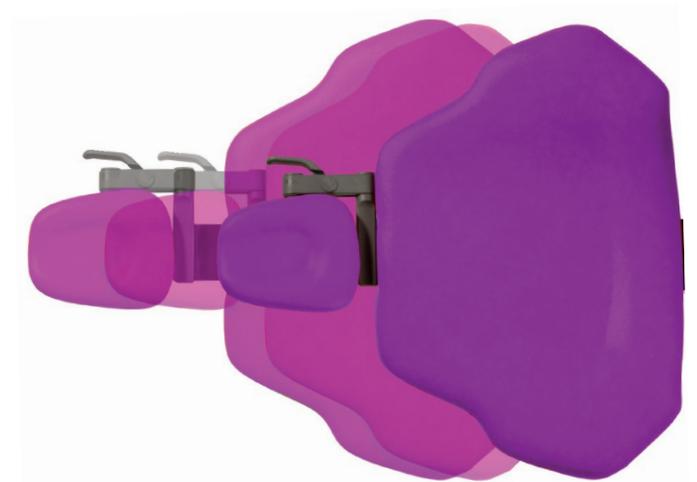

# F1 DENTAL CHAIR

## Unparallel Ergonomics

**F1 DENTAL CHAIR** is compact giving any dental clinic a smart, modern and individual look. The patient sits comfortably during the whole treatment. The excellent working ergonomics allow the dental team to fully focus on the operation to be performed.

- Movement range from flatbed to 90°/90° sitting up position offers easy access to patients and ensures optimal posture for all members of the dental team. Quick and easy Trendelenbourg position for emergency situations.

- Comfort positioning for the patient - anatomic backrest for children and adults alike.

- Ultra thin back and head rests allow you to work in a more comfortable and ergonomic working posture.

**The movement range** of the chair is 51 cm. It facilitates entry and exit for patients, especially children and elderly or disabled persons. The highest position of the chair even enables working standing up.

The compact footprint (50 x 60 cm) of the chair and its knee break leg rest are ideal for small-area clinics with limited floor space. F1 DENTAL CHAIR also avoids an overcrowded look to the room.

electric

- A soft polyurethane base - no rust, no cracks or chips.

- Multiarticulating headrest. You can quickly and easily make adjustments.

- The chair's multi-position armrests easily rotate out of the way or can be completely removed.

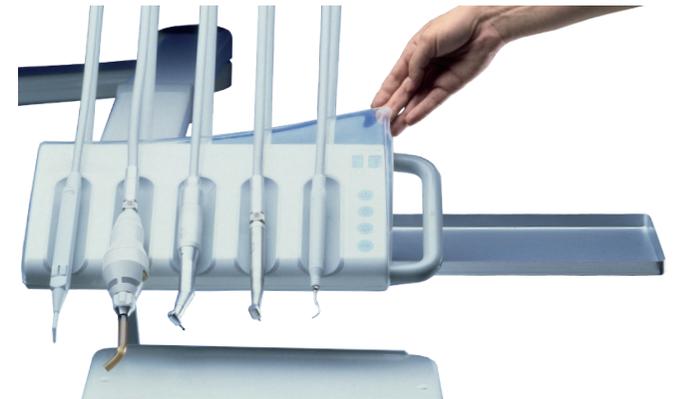

# HYGIENE

**The outer surfaces** of both the chair and the unit are smooth and made of antibacterial materials. This facilitates daily cleaning routines and maximises general hygiene.

Rounded, easy to clean cuspidor has enamel bowl and a timed flush and cup filler. An easily removable and washable porcelain bowl is available for the cuspidor.

- Several disinfecting and clear water systems are available, e.g. an automatic 3-minute-flush for instrument lines (both F1 CONTINENTAL and F1 TRADITIONAL models) and clean water bottle for syringes, instruments and cup filling.

- F1 DENTAL UNIT is delivered with autoclavable silicon covers, both for the instrument and suction modules.

## FLEXIBILITY

- As the instrument arm has 300° movement, the instrument bridge can be folded over the cuspidor for cleaning. This allows unhampered chair entry and exit while the assistant can immediately start with instrument changeover and cleaning. The assistants also have their own controls for the water and chair adjustments.

- The instrument configuration can always be freely chosen from a wide range of alternatives.

- F1 DENTAL UNIT has an impressive selection of different instrument trays or combinations of several trays to choose from.
