

# FIMET F1 ENT

## Examination Chair

This chair is designed specially for ear, nose and throat examinations. It has up to 8 positions that can be programmed into the chair's memory with only a couple of moves.

Chair with high backrest and adjustable head cushion.

Chair with Soft-ENT backrest and ENT headrest.

Horizontal position for microscope examinations  
• Extendable backrest

The armrests can be turned aside and removed. An easy entry and exit is possible even for patients with limited mobility.

# FIMET F1 ENT

- **A 24 V safety power** lift brings the chair from 46 cm up to 97 cm height, as well as to horizontal position for microscope examinations.
- **The chair can be** brought to Trendelenburg position with an easy mechanical handgrip.
- **The chair is available** in rotations of 320 and 360 degrees. There is a fixing mechanism for rotation on both sides under the seat.

**THE ART OF MEDICAL DESIGN**

- **The chair is controlled** by a cordless remote foot control or by double joystick control or by remote hand control.
- **A tray table** that can be turned to both sides of the chair can be easily installed.

**The F1 operator's stool** with the U-shaped base allows close access to the patient. The open front of the stool base stays always in sitting direction and moves easily around the legrest of the ENT chair. The height and tilt of the seat and backrest can be steplessly adjusted.

**Multi-adjustable headrests**

- **The dirt and stain-resistant** upholstery is available in tens of different colours.
- **Installation can be made** by floor bolts, loose assembly by steel base plate or steel base plate with rollers.
