# FIMET IS A DENTAL EQUIPMENT FACTORY

Fimet has the machinery and the know-how to make it happen! Our goal is to deliver exactly what is needed every time for every customer.

■ Careful product and production planning is the cornerstone of all activities at Fimet.

■ Automated wire cutting and laser cutting facilities guarantee exceptional accuracy and freedom of product design. The result is improved functionality and overall durability.

■ Welding robots make sturdy steel frames for all Fimet chairs and units.

■ Using the latest CAD/CAM software we can send the product design specifications directly to our CNC machining centres giving us total freedom in part design, as well as customisations.

"One Person" assembly system. One person completes the assembly of F1 Prime from start to finish according to product specifications. This system maximizes quality control and gives us the freedom to customize the end products.

# ENSURING YOUR SUCCESS

## NETWORK OF TRAINED REPRESENTATIVES

To guarantee customer satisfaction we distribute our products in 50 countries through a network of dealers committed to deliver up-to-date technical and customer service. The companies are constantly provided both sales and technical training ensuring the kind of quality you deserve.

## SWIFT AND FRIENDLY

Fimet is a midsize dental manufacturer. This makes us quicker and more responsive. We are simply closer to our customers - both commercial and after sales service is just a phone call away.

## QUICKEST SPARE PART DELIVERY ON THE MARKET

As virtually all Fimet products including subcomponents are produced and stored in our factory, we are able to react quickly to customers' requests. Spare parts are always at hand and ready for shipment. This is top priority to us.
